

CCSVI and Multiple Sclerosis

Saturday, August 7, 2010
3pm - 6pm

Macomb Community College, South Campus (12 Mile Road & Hayes)
John Lewis Conference Center, ("K" Building)
Macomb Room (Room K301)
14500 E. 12 Mile Road
Warren, Michigan 48088
586-498-4198

Speakers: E. Mark Haacke, PhD, David Hubbard, MD, Sal Sclafani, MD, and Monte Harvill, MD

This is a presentation and fundraising event focused on chronic cerebrospinal venous insufficiency (CCSVI) approach to imaging multiple sclerosis looking for venous abnormalities.

Private philanthropy is required to provide the back bone of the necessary funding. We could wait for governments to respond, we could wait for others to provide the funding, we could wait for other countries to proceed – **or we can donate today and support imaging research on CCSVI in the United States immediately.**

The MRI Institute for Biomedical Research is at the forefront of this new research and has a team ready and waiting to start work in collaboration with imaging sites in the US. However, they do not have the funding. We need to get the research started **NOW** which is why we are asking you to attend this information seminar where you will meet and talk with doctors and scientists who will focus on this new approach and who will be carrying out the research.

Space is limited and advanced registration is required. Ticket price is \$100 per person. You can also make a donation in any amount, of which 100% will go directly to this research project and will be treated as a charitable donation for tax purposes.

This is a grass roots attempt to fund the crucial early stages of CCSVI research.

Please pass this along to anyone within your network who is interested and can help. If you cannot attend please consider making a donation at <http://mrimaging.com/donate.html>

***Sincerely,
Rachel D. Martis-Laze***
